

The HQ-MULTIMIX is an extremely reliable, compact, widely usable and user-friendly electronic dosing pump. Two pumps in one device working together or independently from each another.

- 1 or 2 products can be dosed simultaneously in different %
- Dosage from 0.01% up to 9.99% (standard pump)
- Dosage from 0.001% to 1% (mini pump)
- High capacity up to 3600 ltr/h at 1% 100% accurate dosage starting from a verylow consumption (from 100cc/min.)
- Suitable for dosage of acids, medicines, peroxides etc.
- Usable for wet feeding systems
- Registration of water consumption
- Registration of product consumption
- Alarm at: watercrack, overflow, no flow
- Easy to program
- Dosage adjustable at high temperature (option)
- Combination of standard and mini pump possible

- A. Injection point
- B. Reedcontact on watermeter, pump connection
- C. Suction tube
- D. Air outlet
- > "MIX" products

SAMPLE DOSAGE

DOSAGE	LITRE PER HOUR (consumption)
0,1%	4500**
0,2%	4500**
0,5%	3600
1%	1800
2%	900
3%	600
4%	450
5%	360

(**with different watermeter up to 9000 ltr/hour)

% DOSAGE	DOSAGE	APPLICABLE FOR
1% - 2%	1-2ltr per 100ltr	Medicines
0,1% - 0,2%	1-2ltr per 1000ltr	Acidify
0,01% - 0,02%	1-2ltr per 10.000ltr	Disinfection

140055	HQ-Multimix 2 standard pumps
140065	HQ-Multimix 1 standard pump + 1 mini pump
140075	HQ-Multimix 2 mini pumps

The pump is supplied with watermeters and tubing depending of the pump model

HQ- SOLOMIX / MULTIMIX

Dosage - Medication - Disinfection - Acidification

HQ-SOLOMIX

The HQ-Solomix is our base dosage pump. By means of newest technologies we can offer an extremely reliable, compact, widely usable and user-friendly dosage pump.

For a faster and better installation the watermeter and the injection point have been separated from the dosage pump. This makes it possible to assemble them on both horizontal or vertical way. On this way you will be able to install the dosage pump without getting condens on it.

Suitable for all organic acids without pre-solution and all water-soluble medication

- A. Injection point
- B. Reedcontact on watermeter, pump connection
- C. Suction tube
- D. Air out tubing
- E. Air outlet

Art. 140050 HQ-Solomix incl. 1 watermeter

The pump is supplied complete with watermeter and tubing

HQ-SOLOMIX MOBILE

The electronic dosage pump Solomix has been assembled on a mobile trolley. On this stainless steel trolley, has been assembled a barrel of 50Ltr including mixer, timer and tubing.

Everywhere and rapidly usable!

** Trolley and mixer with barrel also separately available*

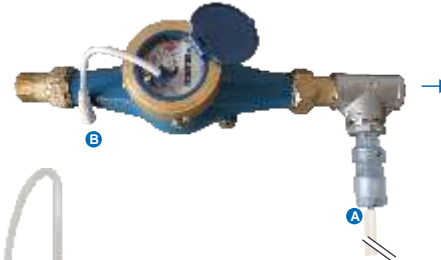

140010	HQ-Solomix mobiel compl.
140015	HQ-Medimix Mobiel zonder pomp
140016	HQ-Medimix vast model vat en mixer

HQ-Solomix mobile

HQ-SOLOMIX MINI

HQ-Solomix MINI is specially designed for *extremely low doses* for applications such as water disinfection and acidification of water.

The pump is made of high quality plastic materials. This makes it possible to pump almost all kinds of products; *pure and undiluted* without a pre-solution is necessary.

Gassing products such as waterstofperoxides, chlorine etc. can be used without difficulty thanks to the standard automatic air vent.

We can guarantee a long life with minimum maintenance due to the minimum presence of moving parts in the pump.

The minimum dose is standard 10cc/1000 ltr water, 0.001% (0.0001% free option) adjustable in steps of 0.001%.

HQ-Solomix MINI has a high capacity, you can easily handle your entire company with a device, the pump can also work up to 5 bar. The water meter can be adjusted to your water pipe diameter, on this way you keep enough water pressure on your company.

Art. 140005 HQ-Solomix Mini incl. 1 watermeter

The pump is supplied complete with watermeter and tubing

Sample dosage:

DOSING	cc/m ³	MAX. FLOW TO ANIMALS
0.001%	10	500 m ³ /hour
0.010%	100	50 m ³ /hour
0.100%	1000	5 m ³ /hour
1.000%	10000	0.5 m ³ /hour

FEATURES AND TECHNICAL INFORMATION:

- Operates from a very low flow (100cc / min.)	- Day counter for water registration	
- High-precision dosing	- Alarm at overcapacity	
- Compact installation, space saving	- Low-maintenance plant	
- Easy installation	- Clear readable dosage	
- Injection point to mount vertically or horizontally	- High capacity (see table *)	
	HQ-SOLOMIX	HQ-SOLOMIX MINI
- Increase / decrease in steps of	0,01%	0,001%
- Wide dosing range	0.01% t/m 9,99%	0.001% t/m 1%
- Up to pressure	3 bar	5 bar
